

MICROS® e7

Color coded touch screens aid in ease of training and speed of operations.

For Long-Term Care Facilities

MICROS® e7 overview

MICROS e7 is specifically designed to meet the point-of-sale needs of smaller long-term care facilities. The e7 fits a critical need for a product with a lower cost that is also easy to install, train, manage, and maintain. As a MICROS-authorized system integrator, CBORD® has seamlessly incorporated the e7 into its Odyssey PCS™ and OdysseyOne™ cashless systems.

The e7 uses tried-and-true MICROS Workstation4 hardware and peripherals. The system runs in a peer-to-peer environment over standard Ethernet wiring with back office support from a personal computer. The system is capable of managing up to six point-of-sale (POS) devices in a single revenue center.

System management and reporting are performed using a standard personal computer (PC), where historical totals and journals are stored for easy information retrieval and management analysis. All management functions can be performed without disrupting front-of-house operations. The Odyssey PCS and OdysseyOne server and e7 back-of-house application can share a single PC. If, however, it is more practical to run these applications on a separate PC that is also an option.

Key features

- Unlimited number of menu items
- A maximum of six POS devices in a single revenue center
- PCI-compliant credit card authorization
- Declining balance, and gift card
- Add-to-balance ability
- Encrypted data communications
- Seamless integration
- "Containers" group like products together, saving screen space
- ReportsPlus provides instant drill-down information
- Online, context-sensitive help system

Ease-of-use

Screen layouts can be customized to optimize functionality for every area of your operation. You can make changes to the menu item screens or add an employee to the system in minutes. MICROS superior touchscreen technology provides your staff with a new level of flexibility. It is easy to learn and easy to use. A new cashier can be trained in less than an hour.

And if you do need support, you can call and speak to one of CBORD's MICROS certified support associates who will have you up and running in no time.

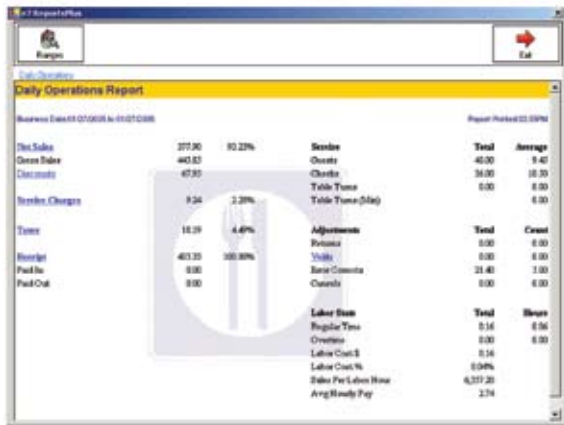

System Highlights

- **Easy to use**
- **Quick to install and train**
- **Reduced initial investment and operational costs**
- **Wide variety of reporting capabilities**
- **Manager's ReportsPlus dashboard**

MICROS® e7

Reporting capabilities

Strong reporting is a valuable tool for running your operation efficiently. e7 provides you with a variety of customized reports such as system reports, sales reports, tender reports, employee reports, labor reports, and workstation reports.

ReportsPlus is an interactive tool for viewing and analyzing report totals from the POS terminal.

2

e7 also provides a convenient ReportsPlus dashboard which allows managers to view daily activities, totals, averages, net sales, and much more.

Available peripherals

- Scale
- Barcode scanner
- Receipt printer
- Kitchen printer
- Up to two cash drawers
- LCD customer display options
- Prox, barcode, and magnetic stripe readers

CBORD support

CBORD offers remote software support 24 hours a day, seven days a week. This means that regardless of when you have a question, you can call the CBORD support team and receive immediate assistance.

A CBORD briefing

The CBORD Group provides more card systems than any other company in the industry. The reason is simple: CBORD knows what its customers want, and delivers it. Wherever you see the CBORD logo, you can feel confident that you have the very best card system available.

CBORD is a registered trademark, and Odyssey PCS and OdysseyOne are trademarks, of The CBORD Group, Inc. All other brand or product names are trademarks, registered trademarks, or service marks of their respective owners.
