

NetCatering®

About Foodservice Suite

Foodservice Suite provides the management tools needed to improve margins, re-energize service, and increase customer satisfaction. All modules of FSS work together seamlessly to automate your operations. The system is scalable—choose just the features that meet your needs, build from this core solution, and add additional capabilities later. Modules include: Menu Management System®, Inventory Management System, Handheld Inventory, Nutritional Accounting System, EventMaster® PLUS!, NetCatering®, NetRecipe®, NetNutrition®, and NetMenu®.

For Continuing Care Facilities

Overview

NetCatering®, a component of the Foodservice Suite® (FSS) from CBORD®, is a web-based catering management tool designed to help catering operations improve service and efficiency. It is a fully customizable and complete e-commerce storefront application. You can reduce your cost of service and provide improved accessibility for your customers with this web alternative to placing orders on the phone. Improve convenience and accuracy for customers and staff!

How does it work?

NetCatering provides a visually appealing and cost-effective way for foodservice operations to merchandize goods and services. With NetCatering, you will increase:

- average sales
- number of sales
- frequency of repeat business

The package includes custom catalogs, dynamic merchandising and up-selling, multiple payment methods, and online purchase and order history.

Event orders created in NetCatering are passed directly into EventMaster® PLUS!, CBORD's full-featured catering management system, providing customer contact, event costing, customized BEOs, billing, and back-of-house management for catering operations.

NetCatering gives your customers the power to book events and place orders for prepared food pickups and deliveries online! It can be used on the Internet or a local intranet.

CBORD, NetCatering, Foodservice Suite, Menu Management System, EventMaster, NetMenu, NetRecipe, and NetNutrition are registered trademarks of The CBORD Group, Inc.
